BLOODLINE TUBING SYSTEM

BLOODLINE TUBING SYSTEM

SIMPLE

A clear, flexible medical tubing system is shown against a light blue background with geometric patterns. The tubing is coiled into a large loop. A red stopcock is attached to the tubing in the upper part of the loop. At the bottom of the loop, there is a red connector. The tubing ends in a clear, tapered tip with a red band near the base.

EFFICIENT

MADE FOR YOU AND YOUR PATIENTS

Over the years, we have worked in close cooperation with dialysis clinics, to develop product features that help meeting the requirements of dialysis providers and patients.

EASY HANDLING AND TRACEABILITY

A clinician-requested feature of our bloodlines is the removable packaging label, which can be peeled off and attached to the patient records.

COMBI-CONNECTOR

Allows for an easy placement of the blood pump segment into the blood pump.

DUAL MATERIAL DIALYZER CONNECTOR

A dialyzer connector design that supports a robust connection to the dialyzer, to help minimize the risk of leaks.

PRESSURE TRANSDUCER PROTECTOR

There is a single or double pressure transducer protector housing, which contains one membrane made of two layers.

* Only for Canada

DN: Double needle
SN: Single needle
DP: Double pump
Radiation = gamma or beta

Please check with your local sales office for the latest information about the bloodline models available.

ACCESSORIES

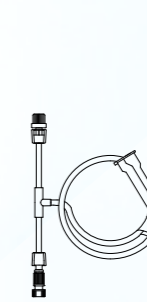

RE-INFUSION LINE

I202
105890

**Sterilization: EtO
DEHP-free**

Infusion line with unvented spike (200 cm, with Male/Female connection) to use with close patient connection, between the bloodline arterial line and the patient access

I201
105889

**Sterilization: EtO
DEHP-free**

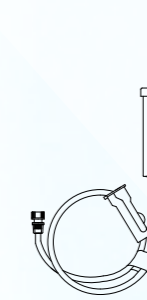

Infusion line with air vented spike (200 cm, with Male/Female connection) to use with close patient connection, between the bloodline arterial line and the patient access

SP-339G
107472

**Sterilization: E-beam
DEHP-free**

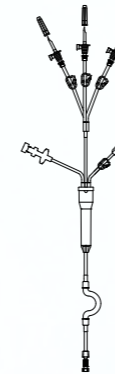

Infusion line (100 cm, with Male connection) for priming/saline infusion

SP-235
103223

**Sterilization: EtO
DEHP-free**

Infusion line (120 cm, with Male/ Male connection) for priming/ saline infusion

MH277/SP332G
115568

For the **Integra** system

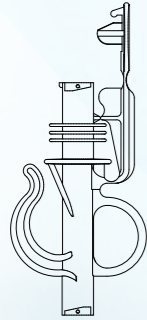

**Sterilization: E-beam
DEHP-free**

Re-infusion line for AFB treatment/ low volume HDF with the **Integra** system, with spikes

NOTE: all the accessories are LATEX FREE

ACCESSORIES

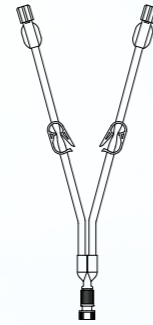

CONNECTOR

EVACLEAN CONNECTOR
114376

Sterilization: EtO

It may be used either as a recirculation adapter during use to short-circuit the arterial and venous patient lines or as a means to connect the blood tubing set to the Waste Handling Option (WHO®) on Innova and Artis/Evosys machines during the priming phase

S-660-C
101354

Sterilization: EtO
DEHP-free

Y-connector (10 cm lines, with Male/2 Female connections) to use with for example single lumen catheter

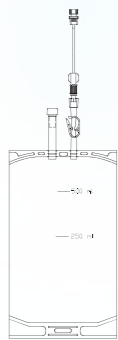

S-1016
101023

Sterilization: EtO
DEHP-free

Extension line Male/Female luer (20 cm) to extend the length of the bloodline patient line

SAMPLING BAG/KIT

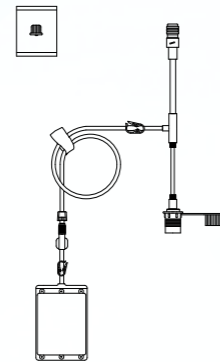

GMB-SP06
115648

For Artis system, Artis Physio system, the AK 200 system, and AK 200 Ultra system

Sterilization: EtO
DEHP-free

Sampling bag 500 ml for micro-biological or chemical dialysis fluid sampling with Male connection

SP-427G
113226

For the AK 200 system, and AK 200 Ultra system

Sterilization: E-beam

Sampling kit of dialysate bath to check its microbiologic quality

ADAPTOR

SP-27
101957

Sterilization: EtO
DEHP-free

Connector Female/Female luer (8 cm) to be used for example when pause treatment (recirculation) is required

PRESSURE TRANSDUCER

SP-221
100583

Sterilization: EtO
DEHP-free

Line with pressure transducer protector (75 cm, with Male/Female connection) when a transducer protector needs to be changed/added

SP-C35
106024

Sterilization: EtO
DEHP-free

Pressure transducer protector (rigid connection, with Male/Female connection) when only the protector needs to be changed/added

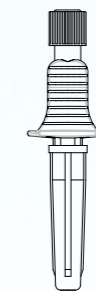

SPIKE

SP-176
101422

Sterilization: EtO
DEHP-free

Spike air vented when bottles are used

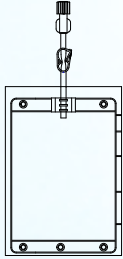

SP-C13
101593

Sterilization: EtO
DEHP-free

Spike unvented with Female connection when bags are used

ACCESSORIES

DRAIN/RINSING BAG

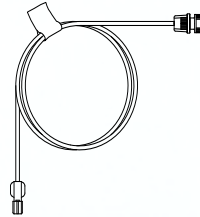

SP-C36
100922

Sterilization: EtO
DEHP-free

3L priming waste bag

HEPARIN LINE

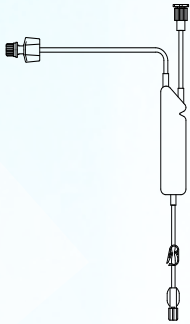

H102C
105767

Sterilization: EtO
DEHP-free

Heparin line (110 cm, with
Male/Female connection),
regional heparinization

EXPANSION CHAMBER

C705
101739

For the **AK 200** system,
and **AK 200 Ultra** system

Sterilization: EtO
DEHP-free

Expansion chamber for
emergency switch from double
needle to single needle/single
pump mode

NOTE: all the accessories are LATEX FREE

For safe and proper use of products mentioned herein, please refer to the appropriate Instructions for Use.
