healthcare within reach

BeneHeart R12 delivers rapid and accurate ECG diagnosis to help you meet a variety of clinical demands

Environment and Modernization

Paperless process delivers faster patient testing and reduces the use of costly ECG paper

- Full print preview image helps you decide if an immediate repeat of an ECG recording is needed, giving you a faster workflow than ever before
- Preview image for instantaneous on-screen review allows you to send data to the ECG management system without printing
- Review on screen helps you to retrieve previous ECG reports at any time

Easy to use technology saves you time

- 8-inch high-resolution colour display
- Optional touchscreen

- User friendly workflow buttons
- Modern designed soft touch hotkeys
- Standard keyboard layout

Patient demographics can be retrieved from the worklist

Anatomically designed cable to minimise tangling and lead reversal

Optional barcode scanner for rapid input of accurate patient demographics

Intelligent design for busy professionals

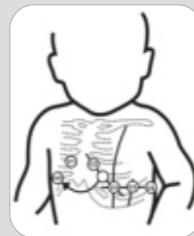

- Stable, clean, and accurate ECG waveforms ensure the quality of ECG data and aid faster processing
- Clear view of results helps you focus on diagnosis and care
- Save up to 800 ECG records internally, or use the USB flash drive for offline ECG storage and transmission
- Lithium ion battery powers greater than 3.5 hours of continuous operation or 400-page recording on one charge
- One of the lightest 12-lead electrocardiographs available – only 4.8 kg
- Optional hardy and compact trolley for easy mobility and storage

Globally recognised Glasgow 12-lead analysis supports diagnostic confidence

I Accurate diagnosis in adults and children from birth upwards. Over 40 years continuous development of the Glasgow algorithm delivers one of the world's best ECG analyses

ID:	2012050454367890
Name:	Doc, John
DOB:	1940-05-01 72Years
Gender:	Male
Race:	Caucasian
Medication 1:	No Medication
Medication 2:	No Medication

Age, gender and ethnicity specific criteria to improve accuracy for individual patients

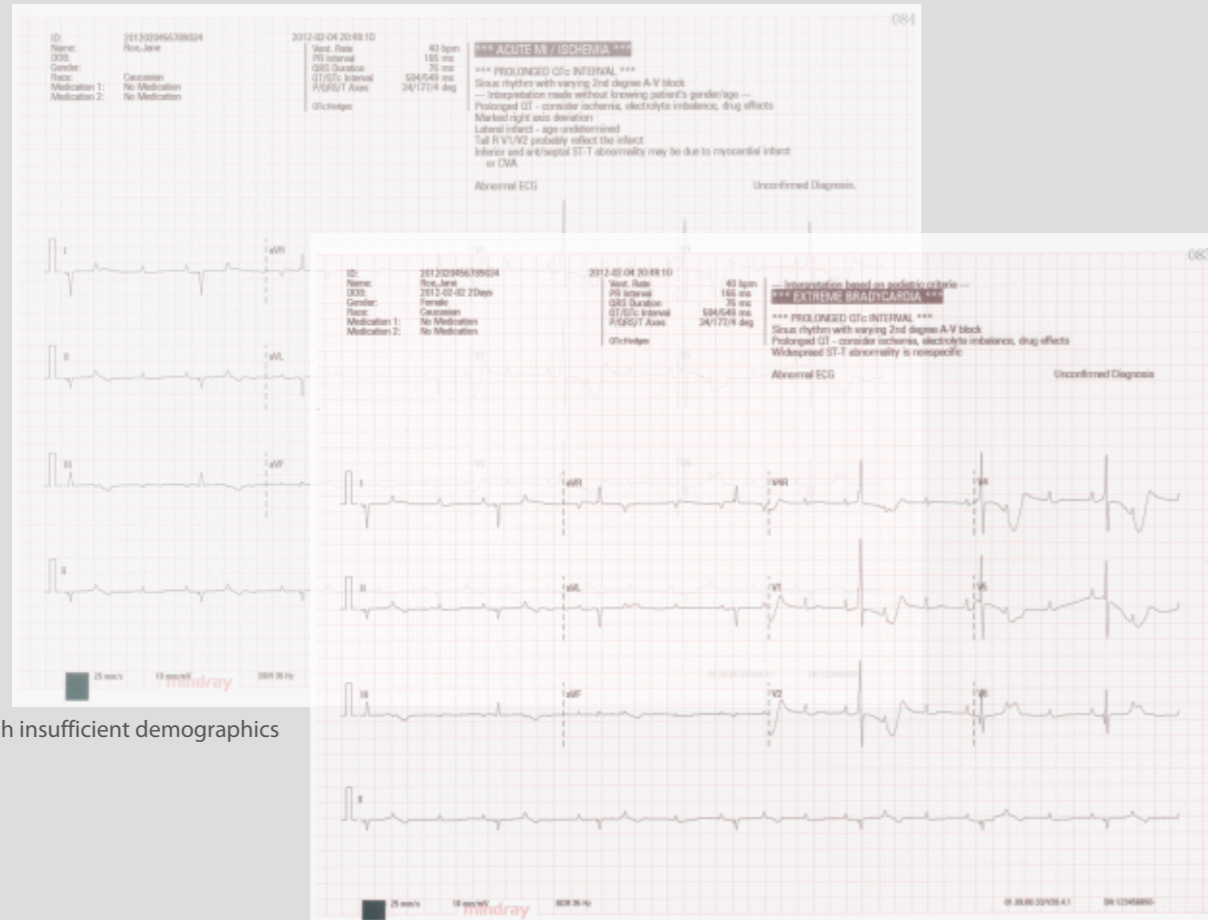

Automated diagnosis using the V₄R (C₄R) electrode placement is ideal for paediatric patients

*** CONSIDER ACUTE STEMI ***	
Sinus arrhythmia with borderline fast degree A	
Left ventricular hypertrophy	
Inferior ST elevation, CONSIDER ACUTE INFAR	
Anterior ST depression is probably reciproc	

Six Critical Value highlighted warnings aid rapid response for potentially urgent issues

II Automated re-analysis after modification of patient demographics aids rapid ECG capture with the option to add patient information later

with insufficient demographics

after demographics update (age, gender added)

Digital pacemaker detection provides reliable report of atrial, ventricular and A-V sequential pacing mode without selecting pacemaker detection sensitivity

Review a significant arrhythmia event by adding additional 1-minute printout after auto ECG operation
