SAFETY

PreludeSYNC EVO™

Radial Compression Device

The PreludeSYNC EVO Radial Compression Device is used to assist in gaining and maintaining haemostasis of the radial or ulnar artery following catheterisation procedures.

DESIGNED FOR CLARITY AND UNIFORMITY

- Large clear window area with unobstructed site visibility.
- Optimised for diffuse and uniform balloon pressure.
- Visible target to facilitate proper placement over arteriotomy.

DESIGNED FOR SAFETY

- Slip-n-Lock™ cap secures syringe during inflation/deflation.
- Specialised connection for safety during inflation.
- If a PreludeSYNC EVO syringe is not available, remove the Slip-n-Lock cap¹ to allow deflation with a standard luer syringe.

Specialised connection³

DESIGNED FOR COMFORT

- Soft comfortable band.
- Easy to secure, adjust, and clean.
- 24 cm and 29 cm sizes available.
